Bespoke Loft-Inspiration Home

“ This home by D' Initial Concept brings personality and style in loft-inspired living “

Making use of wood, strong blacks, and grey tones, D' Initial puts the owner's stamp of personality in the living room where functional space is created with wonderful aesthetics. A large communal dining table flanked by a matching counter top coherently sets off the grey feature wall, while the hanging selves from the ceiling draws the eye upward, creating display nooks for the owner's unique collections.

The brick feature wall and track lights showcase the owner's boldly coloured chairs, meeting anyone who steps in with playful greeting. Bespoke display pieces brings out even more of the owner's charm, with the interior design specifically tailored to keep this in mind.

Defining living space yet enlarging the feel of the home, glass panels framed with Mondrian patterns in industrial black enclose the owner's office space, allowing for a spacious home inspired by loft living in our exciting city.
